## Lavascape II

LANDSCAPE FIRE

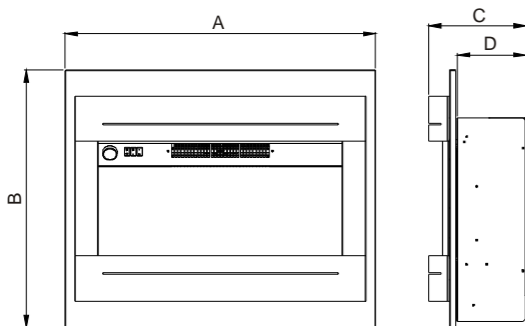

The Lavascape and Lavascape II fires are high efficient traditional moving glow fires with a parabolic stainless steel reflector behind the coals to add depth and realism to the glowing effect.

Options of coal or log effects and a variety of trims and finishes are available. The moving glow effect operates independently of the heat system and can be utilised to introduce additional mood lighting to the living area.

## Lavascape

### Dimensions

Dimensions shown indicate overall dimensions. Please note that the Lavascape and Lavascape II are inset fires. All dimensions in Millimetres

Model	A	B	C	D
Lavascape (Not Shown)	760	570	190	168

Lavascape II	760	630	240	168

# Curvascape II

LANDSCAPE FIRES

Curvascape II Inset or wall hanging

Curvascape II fires are styled to compliment modern decor and have a unique heating system that enables the product to be fitted on a wall partially inset or fully inset.

Curvascape II Glass

The low level forward facing heat outlet will

allow the fire to be fitted directly below a Television and because of the unique way in which the hot air is distributed the Curvascape II can be positioned closer to the floor than many other similar fires because the heat is directed away from the floor and into the room.

Finished in a textured deep grey and stainless steel or optional full glass panel the Curvascape II will bring a unique touch to any room

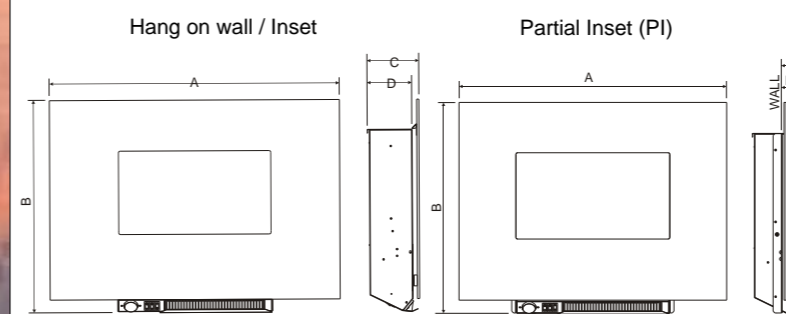

Infrared Remote Option

Unique heater outlet that enables the Curvascape II to be mounted close to the floor

### Dimensions

Dimensions shown indicate overall dimensions. To inset the fire an optional inset kit is required please refer to the detailed specification page for inset dimensions. NOTE: Flamescape II C is not available as an inset fire. All Dimension stated in Millimetres
